1.1.1	ARP	2

1 HTTP example

1.1 Who are you? Where are you?

What is your own IP address? What is your own MAC address? What do these commands display?

```
#ifconfig
$curl ifconfig.me
$netstat -at
```

1.1.1 ARP

Before we can access the Internet we need to know who/what is the gateway. What is the IP address of yours? What is the MAC address? What do these commands display?

```
#route -n
#arp -a
```
