

Network Computing courses

Maël Auzias

ENSIBS - UBS

October 2014

Figure: teaching.auzias.net

Course details

Objectives

- How do *computers* communicate?
- What are the mechanisms **under** an HTTP request or a telegram message?
- Networks are all around us, better study them!

Course details

Evaluation

- Short test at the beginning of every lesson (5 min) ?
- Project
- Final exam (1 hour)
- All same weighting

Material

- Slides available at teaching.auzias.net (github too)

Presentation Outline

- 1 Introduction
 - Definitions and presentation
 - Network classification
 - HTTP request/response example
 - Models overview (OSI and TCP/IP)
- 2 Lower layers
 - Physical
 - Data Link
 - Network
 - Transport
- 3 Upper layers
 - Session
 - Presentation
 - Application

Definitions

- **Network:** an **interconnected** group or system

Definitions

- **Network:** an **interconnected** group or system
- **Internet:** world wide **interconnected system of networks**
RFC791 (September 1981)

Definitions

- **Network:** an **interconnected** group or system
- **Internet:** world wide **interconnected system of networks**
RFC791 (September 1981)
- **IP:** Internet **Protocol** provides the functions necessary to deliver a package of bits from a source to a destination over a network

Definitions

- **Network:** an **interconnected** group or system
- **Internet:** world wide **interconnected system of networks**
RFC791 (September 1981)
- **IP:** Internet **Protocol** provides the functions necessary to deliver a package of bits from a source to a destination over a network
- **(world wide) Web: network** consisting of a collection of Internet websites using HTTP

Definitions

- **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)

Definitions

- **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)

Definitions

- **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)

Definitions

- **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)
- **UDP:** User Datagram **Protocol** provides a procedure for application programs to send messages to other programs with a minimum of protocol mechanism [RFC768 \(August 1980\)](#)

Definitions

- **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)
- **UDP:** User Datagram **Protocol** provides a procedure for application programs to send messages to other programs with a minimum of protocol mechanism [RFC768 \(August 1980\)](#)
- **RFC:** Request For Comments (Internet Draft (ID), RFC, Internet Standard)

Definitions

- **Router:** network **hardware** providing routing services

Definitions

- **Router:** network **hardware** providing routing services
- **Routing:** **algorithm processed** to decide where to forward a packet

Definitions

- **Router:** network **hardware** providing routing services
- **Routing:** **algorithm processed** to decide where to forward a packet
- **Forwarding:** **action** of moving a packet from one NIC to another

Definitions

- **Router:** network **hardware** providing routing services
- **Routing:** **algorithm processed** to decide where to forward a packet
- **Forwarding:** **action** of moving a packet from one NIC to another
- **NIC:** Network Interface Card
- **Switch (hub):** network **hardware** connecting systems using packet switching

Definitions

- **Router:** network **hardware** providing routing services
- **Routing:** **algorithm processed** to decide where to forward a packet
- **Forwarding:** **action** of moving a packet from one NIC to another
- **NIC:** Network Interface Card
- **Switch (hub):** network **hardware** connecting systems using packet switching
- **Packet switching:** forward-like method regardless of the content (destination-based)

Definitions

- **Router:** network **hardware** providing routing services
- **Routing:** **algorithm processed** to decide where to forward a packet
- **Forwarding:** **action** of moving a packet from one NIC to another
- **NIC:** Network Interface Card
- **Switch (hub):** network **hardware** connecting systems using packet switching
- **Packet switching:** forward-like method regardless of the content (destination-based)
- **NAT:** Network Address Translation, router modifying IP address into another IP address.

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server
- **Request: application message** destined for a server (*order*)

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server
- **Request: application message** destined for a server (*order*)
- **Server: computer** able to respond a client's requests

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server
- **Request: application message** destined for a server (*order*)
- **Server: computer** able to respond a client's requests
- **Request: application message** destined for a client (*result*)

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server
- **Request: application message** destined for a server (*order*)
- **Server: computer** able to respond a client's requests
- **Request: application message** destined for a client (*result*)
- **Fat client: application** where most functions are processed by the client itself

Definitions

- **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- **Client: computer** able to send requests to a server
- **Request: application message** destined for a server (*order*)
- **Server: computer** able to respond a client's requests
- **Request: application message** destined for a client (*result*)
- **Fat client: application** where most functions are processed by the client itself
- **Thin client: application** where most functions are carried out on a central server

What kind of network is it?

- **BAN:** Body Area Network

What kind of network is it?

- **BAN:** Body Area Network
- **PAN:** Personal Area Networks

What kind of network is it?

- **BAN:** Body Area Network
- **PAN:** Personal Area Networks
- **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)

What kind of network is it?

- **BAN:** Body Area Network
- **PAN:** Personal Area Networks
- **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)
- **MAN:** Metropolitan Area Networks, can cover a whole city

What kind of network is it?

- **BAN:** Body Area Network
- **PAN:** Personal Area Networks
- **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)
- **MAN:** Metropolitan Area Networks, can cover a whole city
- **WAN:** Wide Area Networks cover a broad area (Internet)

Topologies

Figure: upload.wikimedia.org

Topologies

- **Point-to-point:** two entities directly connected to each other (tunnel).

¹Hong Kong protesters use a mesh network to organize 

Topologies

- **Point-to-point:** two entities directly connected to each other (tunnel).
- **Ring:** data go around the ring, unidirectional way network.

¹Hong Kong protesters use a mesh network to organize 

Topologies

- **Point-to-point:** two entities directly connected to each other (tunnel).
- **Ring:** data go around the ring, unidirectional way network.
- **Mesh:** all nodes cooperate in the distribution of data in the network¹.

¹Hong Kong protesters use a mesh network to organize 

Topologies

- **Point-to-point:** two entities directly connected to each other (tunnel).
- **Ring:** data go around the ring, unidirectional way network.
- **Mesh:** all nodes cooperate in the distribution of data in the network¹.
- **Star:** all messages go through the same central node, reducing network failure.

How do messages reach their destination?

Figure: acenk90.files.wordpress.com

More like this...

How does it work? From signal to application...

Figure: OSI model

Presentation Outline

- 1 Introduction
 - Definitions and presentation
 - Network classification
 - HTTP request/response example
 - Models overview (OSI and TCP/IP)
- 2 Lower layers
 - Physical
 - Data Link
 - Network
 - Transport
- 3 Upper layers
 - Session
 - Presentation
 - Application

From analog/logical signals up to messages
