

# Network Computing courses

Maël Auzias

ENSIBS - UBS

October 2014

Figure: [teaching.auzias.net](http://teaching.auzias.net)

# Course details

## Objectives

- ▶ How do *computers* communicate?
- ▶ What are the mechanisms **under** an HTTP request or a telegram message?
- ▶ Networks are all around us, better study them!

# Course details

## Evaluation

- ▶ Short test at the beginning of every lesson (5 min) ?
- ▶ Project
- ▶ Final exam (1 hour)
- ▶ All same weighting

## Material

- ▶ Slides available at [teaching.auzias.net](https://teaching.auzias.net) (github too)

# Presentation Outline

## Introduction

- Definitions and presentation

- Network classification

- HTTP request/response example

- Models overview (OSI and TCP/IP)

## Layers

- Physical

- Data Link

- Network

- Transport

- Session

- Presentation

- Application

# Definitions

- ▶ **Network:** an **interconnected** group or system

# Definitions

- ▶ **Network:** an **interconnected** group or system
- ▶ **Internet:** world wide **interconnected system of networks**  
RFC791 (September 1981)

# Definitions

- ▶ **Network:** an **interconnected** group or system
- ▶ **Internet:** world wide **interconnected system of networks**  
[RFC791 \(September 1981\)](#)
- ▶ **IP:** Internet **Protocol** provides the functions necessary to deliver a package of bits from a source to a destination over a network

# Definitions

- ▶ **Network:** an **interconnected** group or system
- ▶ **Internet:** world wide **interconnected system of networks**  
[RFC791 \(September 1981\)](#)
- ▶ **IP:** Internet **Protocol** provides the functions necessary to deliver a package of bits from a source to a destination over a network
- ▶ **(world wide) Web: network** consisting of a collection of Internet websites using HTTP

# Definitions

- ▶ **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)

# Definitions

- ▶ **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- ▶ **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)

# Definitions

- ▶ **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- ▶ **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- ▶ **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)

# Definitions

- ▶ **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- ▶ **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- ▶ **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)
- ▶ **UDP:** User Datagram **Protocol** provides a procedure for application programs to send messages to other programs with a minimum of protocol mechanism [RFC768 \(August 1980\)](#)

# Definitions

- ▶ **HTTP:** Hypertext Transfer **Protocol**, application-level protocol for distributed, collaborative, hypermedia information systems [draft HTTP2 \(July 2014\)](#)
- ▶ **FTP:** File Transfer **Protocol** promotes sharing of files, encourages the use of remote computers [RFC959 \(October 1985\)](#)
- ▶ **TCP:** Transmission Control **Protocol** is intended for use as a highly reliable host-to-host [RFC761 \(January 1980\)](#)
- ▶ **UDP:** User Datagram **Protocol** provides a procedure for application programs to send messages to other programs with a minimum of protocol mechanism [RFC768 \(August 1980\)](#)
- ▶ **RFC:** Request For Comments (Internet Draft (ID), RFC, Internet Standard)

# Definitions

- ▶ **Router:** network **hardware** providing routing services

# Definitions

- ▶ **Router:** network **hardware** providing routing services
- ▶ **Routing:** **algorithm processed** to decide where to forward a packet

# Definitions

- ▶ **Router:** network **hardware** providing routing services
- ▶ **Routing:** **algorithm processed** to decide where to forward a packet
- ▶ **Forwarding:** **action** of moving a packet from one NIC to another

# Definitions

- ▶ **Router:** network **hardware** providing routing services
- ▶ **Routing: algorithm processed** to decide where to forward a packet
- ▶ **Forwarding: action** of moving a packet from one NIC to another
- ▶ **NIC:** Network Interface Card
- ▶ **Switch (hub):** network **hardware** connecting systems using packet switching

# Definitions

- ▶ **Router:** network **hardware** providing routing services
- ▶ **Routing: algorithm processed** to decide where to forward a packet
- ▶ **Forwarding: action** of moving a packet from one NIC to another
- ▶ **NIC:** Network Interface Card
- ▶ **Switch (hub):** network **hardware** connecting systems using packet switching
- ▶ **Packet switching:** forward-like method regardless of the content (destination-based)

# Definitions

- ▶ **Router:** network **hardware** providing routing services
- ▶ **Routing:** **algorithm processed** to decide where to forward a packet
- ▶ **Forwarding:** **action** of moving a packet from one NIC to another
- ▶ **NIC:** Network Interface Card
- ▶ **Switch (hub):** network **hardware** connecting systems using packet switching
- ▶ **Packet switching:** forward-like method regardless of the content (destination-based)
- ▶ **NAT:** Network Address Translation, router modifying IP address into another IP address.

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server
- ▶ **Request: application message** destined for a server (*order*)

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server
- ▶ **Request: application message** destined for a server (*order*)
- ▶ **Server: computer** able to respond a client's requests

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server
- ▶ **Request: application message** destined for a server (*order*)
- ▶ **Server: computer** able to respond a client's requests
- ▶ **Response: application message** destined for a client (*result*)

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server
- ▶ **Request: application message** destined for a server (*order*)
- ▶ **Server: computer** able to respond a client's requests
- ▶ **Response: application message** destined for a client (*result*)
- ▶ **Fat client: application** where most functions are processed by the client itself

# Definitions

- ▶ **Node (network):** any entity that can send packets to/receive packets from a network through a NIC
- ▶ **Client: computer** able to send requests to a server
- ▶ **Request: application message** destined for a server (*order*)
- ▶ **Server: computer** able to respond a client's requests
- ▶ **Response: application message** destined for a client (*result*)
- ▶ **Fat client: application** where most functions are processed by the client itself
- ▶ **Thin client: application** where most functions are carried out on a central server

# What kind of network is it?

- ▶ **BAN:** Body Area Network

# What kind of network is it?

- ▶ **BAN:** Body Area Network
- ▶ **PAN:** Personal Area Networks

# What kind of network is it?

- ▶ **BAN:** Body Area Network
- ▶ **PAN:** Personal Area Networks
- ▶ **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)

# What kind of network is it?

- ▶ **BAN:** Body Area Network
- ▶ **PAN:** Personal Area Networks
- ▶ **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)
- ▶ **MAN:** Metropolitan Area Networks, can cover a whole city

# What kind of network is it?

- ▶ **BAN:** Body Area Network
- ▶ **PAN:** Personal Area Networks
- ▶ **(W)LAN:** (Wireless) Local Area Networks (home, office, school or airport)
- ▶ **MAN:** Metropolitan Area Networks, can cover a whole city
- ▶ **WAN:** Wide Area Networks cover a broad area (Internet)

# Topologies

Figure: [upload.wikimedia.org](http://upload.wikimedia.org)

# Topologies

- ▶ **Point-to-point:** two entities directly connected to each other (tunnel).

# Topologies

- ▶ **Point-to-point:** two entities directly connected to each other (tunnel).
- ▶ **Ring:** data go around the ring, unidirectional way network.

# Topologies

- ▶ **Point-to-point:** two entities directly connected to each other (tunnel).
- ▶ **Ring:** data go around the ring, unidirectional way network.
- ▶ **Mesh:** all nodes cooperate in the distribution of data in the network<sup>1</sup>.

---

<sup>1</sup>Hong Kong protesters use a mesh network to organize
